

EcoDiscovery: Interactive Ecosystem Learning

Final Scrum Report

Team Name: Eco Explorers (Group G)

Members: Rayansh, Chriss, Jeremiah, Abiranna

Course: ENSE 281 – Software Engineering Management

Date: 8 April 2026

Agenda

- ▶ **Project Overview**
- ▶ **Problem & Motivation**
- ▶ **Users**
- ▶ **Vision & Approach**
- ▶ **Scrum & Planning**
- ▶ **System Design (MVC) & MVP**
- ▶ **Reflection & Future**

PROBLEM & MOTIVATION (Why)

- Learners struggle to connect with ecosystems they have never explored
- Low engagement leads to low retention and low conservation awareness
- People care more when they discover, not when they are just told

Target Users (Who)

Primary Users

- Grade 2–3 Students
- Age: 7–9 years
- Beginner learners of ecosystems

Secondary Users

- Teachers
- Parents

Vision & Approach (How)

- Create a fun and interactive learning experience
- Use visual and discovery-based interaction
- Design a simple, child-friendly interface
- Focus on delivering a working MVP with core features

Key Decisions Guiding Our MVP

Scope Decisions

- Defined interactive learning flow
- Guided development of click, discover, and learn features

User Stories

- Focused on **one ecosystem only**
- Prioritized **core learning features**

Filter by keyword or by field

Backlog 3

These are Thought Tasks

Ense_281_eco_discovery_app #44

Add weather & day/night ecosystem effects

Ense_281_eco_discovery_app #45

Add more ecosystems (forest, ocean, etc.)

Ense_281_eco_discovery_app #46

Add more animal animations & idle behaviors

Todo 3

This item hasn't been started

Ense_281_eco_discovery_app #47

Improve UI/UX polish and animations

Ense_281_eco_discovery_app #48

Add gamification (levels, rewards, scoring)

Ense_281_eco_discovery_app #49

Enhance accessibility & usability

+ Add item

In Progress 2

This is actively being worked on

Ense_281_eco_discovery_app #50

Minor UI refinements & performance improvements

Done 14

This is completed

Ense_281_eco_discovery_app #34

Low fidelity prototype design

Ense_281_eco_discovery_app #35

High fidelity prototype design

Ense_281_eco_discovery_app #51

User flow & interaction mapping

Ense_281_eco_discovery_app #52

MVC architecture design

Ense_281_eco_discovery_app #53

Development structure setup (frontend + backend)

Ense_281_eco_discovery_app #54

JSON animal data model (Supabase)

Ense_281_eco_discovery_app #55

Interactive ecosystem game

Ense_281_eco_discovery_app #56

Animal discovery & hint system

Backlog 3

These are Thought Tasks

Ense_281_eco_discovery_app #44

Add weather & day/night ecosystem effects

Ense_281_eco_discovery_app #45

Add more ecosystems (forest, ocean, etc.)

Ense_281_eco_discovery_app #46

Add more animal animations & idle behaviors

Todo 3

This item hasn't been started

Ense_281_eco_discovery_app #47

Improve UI/UX polish and animations

Ense_281_eco_discovery_app #48

Add gamification (levels, rewards, scoring)

Ense_281_eco_discovery_app #49

Enhance accessibility & usability

In Progress 2

This is actively being worked on

Ense_281_eco_discovery_app #50

Minor UI refinements & performance improvements

Done 14

This is completed

backend)

Ense_281_eco_discovery_app #54

JSON animal data model (Supabase)

Ense_281_eco_discovery_app #55

Interactive ecosystem game

Ense_281_eco_discovery_app #56

Animal discovery & hint system

Ense_281_eco_discovery_app #57

Educational animal information popups

Ense_281_eco_discovery_app #58

Sticker unlock system (progress tracking)

Ense_281_eco_discovery_app #59 ...

Express backend setup (API routes, security)

Ense_281_eco_discovery_app #60

Supabase database integration

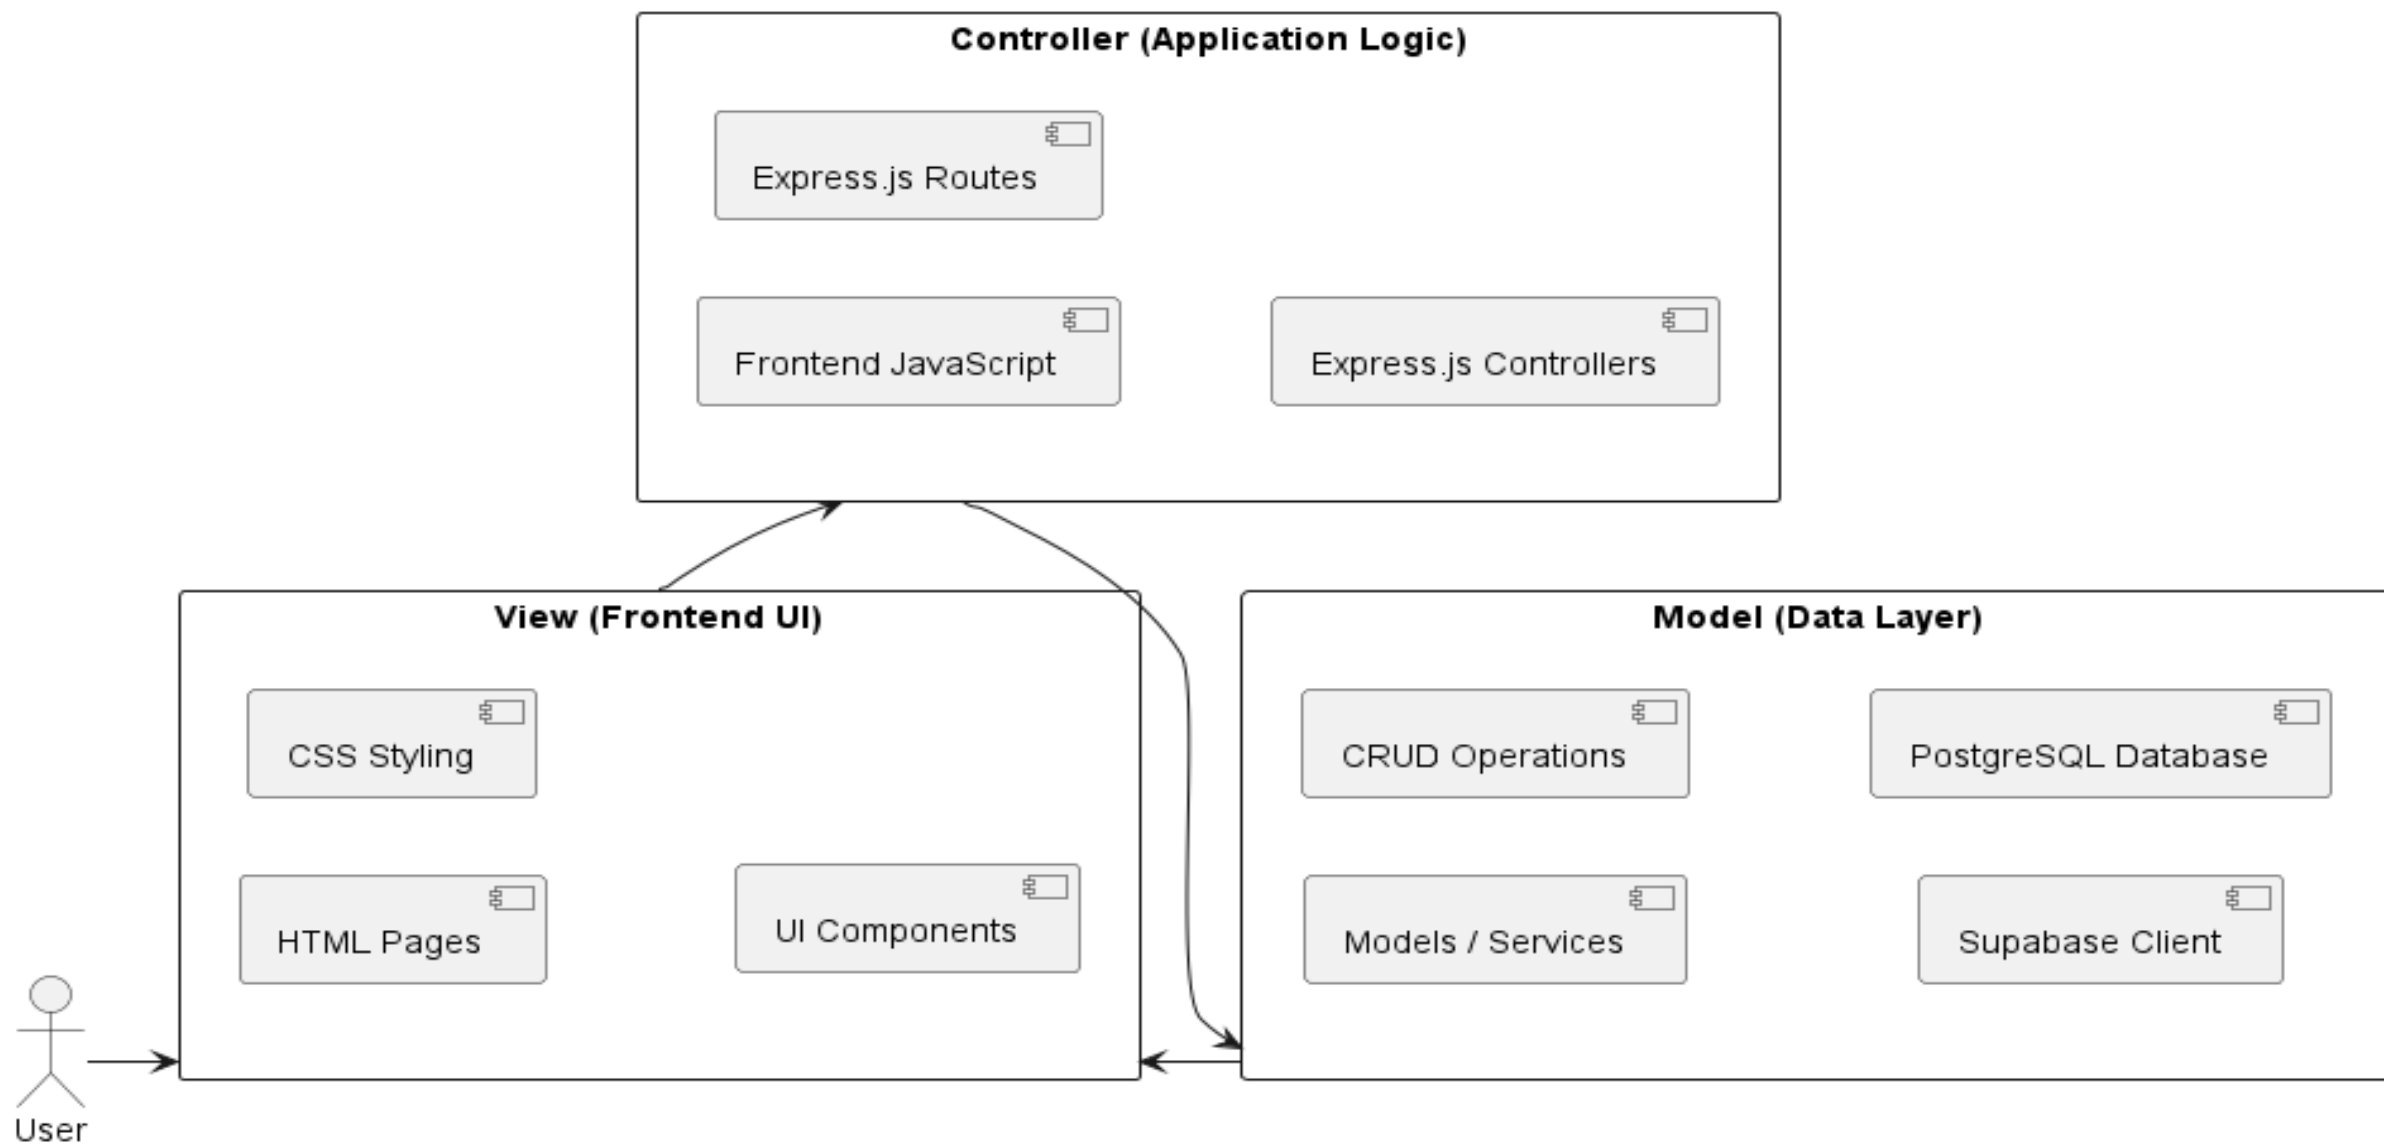

Ense_281_eco_discovery_app #61

Feedback system (user input)

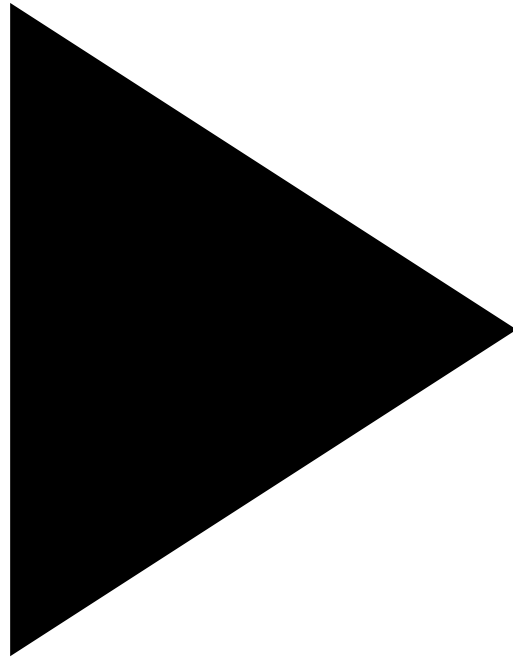

Ense_281_eco_discovery_app #62

Admin dashboard (manage feedback)

EcoDiscovery - MVC Tech Stack Overview

MVP Demo

Reflection & MVP Insights

What Makes It an MVP

- Focused on one ecosystem
- Includes core features only
- Delivers a working interactive experience

What We Are Happy With

- Simple and child-friendly design
- Interactive learning experience
- Successfully working prototype

What Can be Improved

- Add more ecosystems and content
- Improve animations and interactions
- Enhance engagement features

Next MVP Vision

- Expand to multiple ecosystems
- Add gamification (rewards, levels)
- Improve UI and performance

Thank You!

Any Questions ?
